# falce

Partition

**22010-22999**

falce - a gentle approach to office space division. Flowing shapes are combined with soft fabrics to produce expressive, comforting environments; and together with a range of partition shapes and components, falce provides you with a refined, elegant and flexible area management system.

DESIGN • CHIAKI MURATA

# A New Office Space Concept

The falce system offers you a new concept in office space division. Without compromising functionality or versatility, falce actualises the idea of mental affect taking priority over strict spacial efficiency. Fabric covers are stretched over curved light-weight aluminium frames, thus providing quick access to a graceful and comforting environment. falce is the ideal choice for those seeking a softer approach to corporate interior design.

## Features

---

### Fabric Colours

Five colour options are available for coordinating with your space: white, grey, orange, red and black. Colours can be easily changed by replacing the fabric covers.

### Size Variations

The falce system consists of four round partition types, two flat partition types, and four height options for each respective shape, thus giving it the flexibility to cater to various spaces.

\*Note that partitions of differing height can not be connected together.

### Washable Cover

By undoing the zip fastener at the base of the screen, the fabric cover can be removed from the aluminium frame. The covers are washable, so it is always possible to restore them to a pristine state.

### Easily Transportable

Employing light weight aluminium, falce partitions can be easily lifted, transported and relocated for quick layout changes.

### Custom Fabric Printing

Fabric printing is available optionally, allowing you to customise partition imagery to suit your needs.

\*Printing is only available for white fabric.

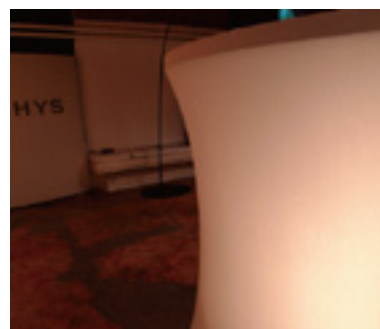

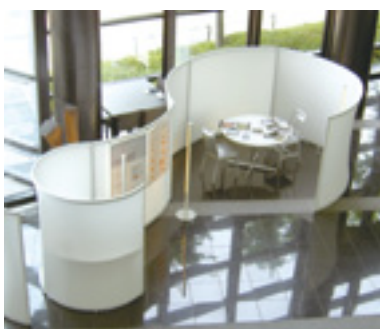

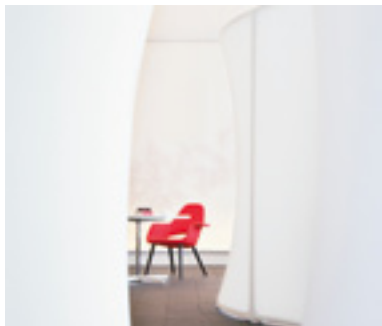

### Projection Screen

falce's white fabrics can be used as basic projection screens, making them ideal for simple home theatre applications or event space video displays.

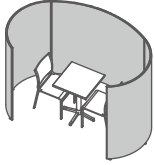

Usage Examples

---

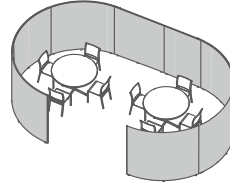

Round and flat partitions can be combined to produce various useful configurations.

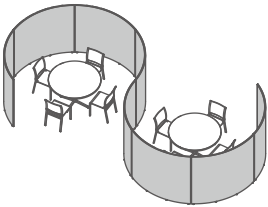

Example 1

Small meeting booth created using connected R700 and R1700 partitions.

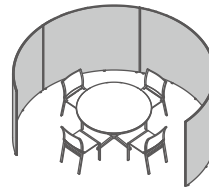

Example 2

Lounge space created using connected R1700 and flat partitions.

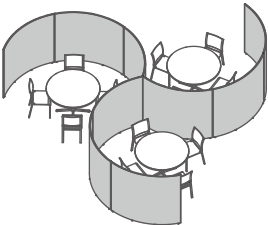

Example 3

Two 4-person meeting booths created using eight connected R1700 partitions.

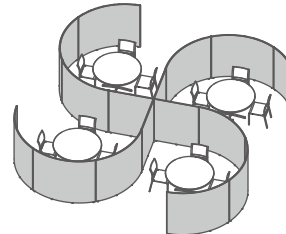

Example 4

Single 4-person meeting booth created using four connected R1700 partitions.

Example 5

Three meeting booths created using a three-way connector.

Example 6

Four meeting booths created using a four-way connector.

Many other configurations are possible using the falce system's range of partition shapes, sizes and connector components.
